EXPERIENCE

Jan - May 2019 > **Chalkboard** / *Front-End Developer*

Using Agile Scrum Methodology my team recreated a blackboard quiz CRUD app. The web app was made with a RESTful API using Node.js and Express that connected to a MySQL database deployed on Azure. While working in this collaborative environment I used key scrum metrics (sprint burn down, team velocity) to deliver committed work.
Tech Stack: HTML/CSS/JS/Node.js/Express/MySQL/Azure

Feb - May 2019 > **AATLAS** / *Web Developer intern*

While working with AATLAS I used responsive web designs and development principles to bring mockups to life as requested. I collaborated closely with the program to provide support during all phases of delivery. Monitoring the website performance and fixing front end related issues while communicating technical issues in a coherent way to my client.
Tech Stack: HTML/CSS/JS

Spring 2017 > **Mentor Match** / *IOS developer*

My team created an App called “Mentor Match” that paired students with mentors. Motivate students and mentors to consume curricular and extracurricular information in order to meet the program requirements. **Tech Stack:Swift**

SKILLS

HTML, CSS, JavaScript, ReactJS, Python, MySQL, Bootstrap, WordPress, GitHub, Photoshop

EDUCATION

> **Bachelors Degree** / *University at Albany*

2016 - 2020 Bachelor of Arts degree in Computer Science Minor in Informatics

PROJECTS

[1] Wegmans for you

March 2020
User enters dish that they plan to cook, our application breaks it down by ingredients needed, uses two of the Wegmans APIs and returns the amount of calories in one serving of the dish **React/HTML/CSS/Python/Flask**

[2] 35mm live

Summer 2020
Shooting film is a hobby of mine. I built this website to post photos from travel.
HTML/CSS/JS/ReactJS

[3] ronniewhite.io

Winter 2020
My personal website has a few animations and is responsive. On it you can find links to my projects, GitHub,dev.to and LinkedIn.
